

Pumpkin Seed Dehuller

Description

Pumpkin seeds dehuller is design to dehull pumpkin seeds, separate shells and kernels, and re-dehull the unshelled pumpkin seeds. Pumpkin seeds dehuller can optimize your products and add your product value.

Application

Pumpkin seeds

Features

It is a kind of wet method dehulling process

It has obvious improvement on efficiency of dehulling ratio and decrease the broken ratio.

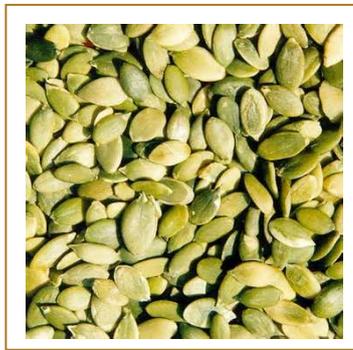

It adopts negative pressure suction to collect the pumpkin shells.

It has compact design, easy to use, low material loss and low maintenance

Technical Data

Model:	PS30 Pumpkin seeds dehuller
Capacity(kg/h):	300
Power (kw):	8.19
Whole Kernel Ratio:	95%
Residual Kernel Ratio:	5%
Demenstion(mm):	6500×2900×3500
Weight(kg):	2500
